

MEDREACH

The right hospital, right now.

“An AI-powered platform designed to connect people with the right emergency healthcare, at the right time.”

CITIZEN

Speak or type the emergency in Hindi / English / Hinglish.

HOSPITAL

Receive referral, accept the case & prepare the ER.

108 / 102

Dispatch ambulance + provide live status.

In an emergency, every second matters. Quick access to the right medical care can make a critical difference in a patient's outcome.

“From emergency call to hospital door — every second matters.”

SCENARIO

THE EMERGENCY

- ✦ 9:40 PM, a village near Berasia: Ramesh's father (58) has chest pain and sweating.
- ✦ Only 2G works; the town hospital is 25 km away.
- ✦ Nobody knows which hospital has a cardiologist and a free ICU bed tonight.
- ✦ Calling 108 means repeating the address on a weak line.

From Guesswork to Guaranteed Care

Right hospital | Confirmed bed | 108 linked

Today

With Medreach

1 FINDING A HOSPITAL

Drive to the nearest one

Only hospitals that can treat it

2 CONFIRMING A BED

Refused at the gate

Hospital accepts first

3 CALLING 108

Repeat address, call drops

Signed incident sent

4 INFORMING THE ER

Arrives unannounced

AI pre-arrival note

5 TRACKING

No idea where it is

Live map + ETA

The Result Guesswork → Confirmed bed

WHAT MEDREACH DOES

- ✦ Understands Hindi or English voice in seconds.
- ✦ Shows only hospitals with the right specialist, bed and blood – live.
- ✦ Hospital accepts and reserves a bay before the family leaves.
- ✦ Hands the case to 108 / 102 and tracks the ambulance.

Why Medreach?

Right hospital

Accept first

108 linked

Works on 2G

Secure data

Every emergency, a confirmed bed

THE PROBLEM

- Nearest hospital may not have the required specialist, ICU, or equipment.
- Families may discover capacity problems only after reaching the hospital.
- Hospital availability can become outdated without regular updates.
- Rural users may face weak 2G or unreliable mobile data.

CORE PROBLEM

In emergencies, people struggle to reach the right hospital because the nearest facility may not have the required specialist, resources, or current capacity.

MEDREACH CONNECTS

CITIZEN / FAMILY

Voice or text emergency input

Location + basic details

See matched hospitals

Track ambulance / status

HOSPITAL

Receive pre-alert

Accept / decline referral

Reserve receiving capacity

Update beds, doctors, resources

CONTROL ROOM

Incident visibility

Dispatch coordination

Ambulance status

Signed handover

Can we make emergency care smarter—connecting every patient to the right hospital at the right time??

THE COMPLETE FLOW: From First Words to a Confirmed Bed

REAL SCREENS FROM THE LIVE PROTOTYPE

RULES WE NEVER BREAK

-  Hospital accepts before anyone travels
-  Only hospitals that can treat the case
-  60 s without an answer → next hospital
-  Never diagnoses - says "may indicate"
-  Call 108 is visible on every screen

TECHNICAL APPROACH

IMPLEMENTATION & FEASIBILITY

BUILT & WORKING

- Live website – no app store needed
- Citizen app, hospital dashboard, 108 console
- 94 automated tests · Hindi + English
- Open-source stack – no licence cost

KEY RISKS

- Hospitals may not keep data current
- Weak or no network in villages
- Each state's 108 runs its own system
- Health and Aadhaar data privacy

MITIGATION

- 108-min cycle, named officer, “unverified” flag
- SMS gateway, offline app, 108 / 112 call
- Open signed contract + practice control room
- AUA/KUA OTP, AES-256-GCM, consent

1 PROTOTYPE LIVE

2 DISTRICT PILOT

3 MP ROLLOUT

4 NATIONAL 108 / 102

PROTOTYPE TODAY

- 16 hospitals · 4 districts (sample data)
- 9-ambulance practice 108 fleet
- Aadhaar OTP (simulated UIDAI)
- Live: medreach-2.onrender.com

NEXT PILOT

- Bhopal division with CMHO + 108 operator
- Real Data Update Officers
- Licensed AUA/KUA + DLT SMS
- Measure time to confirmed bed

SCALE

- All districts of Madhya Pradesh
- Any state's 108 / 102 – same contract
- Capacity analytics for health dept.
- ABHA health-record link

Live 108 control room (deployed site)

FEASIBLE TODAY: SOFTWARE ONLY, RUNS ON PHONES AND HOSPITAL PCs ALREADY IN USE

TODAY vs MEDREACH

Capability	Calling around	Map apps	Medreach
Specialist & ICU free right now	maybe	✗	✓
Hospital confirms before travel	sometimes	✗	✓
Speak Hindi, AI understands	✓	✗	✓
108 gets location + hospital	✗	✗	✓
Works on 2G / SMS / offline	✓	✗	✓
Data owner, 108-min freshness	✗	✗	✓
Verified users, tamper-proof log	✗	✗	✓

KEY INNOVATIONS

- ✦ Accept before travel: no family leaves without a hospital's "yes".
- ✦ Explainable match score out of 100 – every part shown.
- ✦ 108-minute update cycle with a named Data Update Officer.
- ✦ Signed 108 hand-off any state's control room can adopt.
- ✦ A whole emergency fits in one SMS (#MR1 code) on 2G.

Try the SMS channel

This is the exact SMS the user writes when there is no internet. In the demo it goes straight to our server instead of through an SMS gateway – the server then does exactly what it does for a real SMS.

Emergency in a village near Beraisa

Heart attack – chest pain

MEDREACH SOS: Heart attack / chest pain (CRITICAL) at 23.60123,77.40456
#MR1 Cardiac C 23.60123 77.40456 - en

MEDREACH SS-FR658: Heart attack / chest pain (CRITICAL) received. Asking CHC Beraisa to accept now – you will get an SMS. If the patient gets worse, CALL 108.

Open live tracking

works on 2G

Sign in or register with Aadhaar + OTP. One verified account per person, so fake accounts can't be created.

OTP sent to the mobile linked with Aadhaar XXXX XXXX 0013: *****1001. Valid for 5 minutes.

Demo only (simulated UIDAI, no SMS is sent): your OTP is 156148

6-digit OTP

Aadhaar + OTP

one person, one account

IMPACT AND BENEFITS

CITIZENS

Right hospital the first time
Speak – no forms in panic
Track the ambulance live

HOSPITALS

Patients arrive announced
Bay ready, SBAR note first
Fewer unsuitable walk-ins

108 & GOVT.

Complete incident, no re-asking
Live capacity map of MP
A data owner for every hospital

RURAL MP

Works on 2G, SMS and offline
102 Janani Express for mothers
ASHA workers can report

◆ KEY BENEFITS OF CONNECTED EMERGENCY CARE ◆

FASTER DECISIONS

Guesswork
→ **Confirmed**

- Hospital must answer in 60 s
- Ranked list in seconds

RIGHT HOSPITAL

- Only hospitals that can treat it
- Fewer second trips

LOW COST

No new hardware ✗

- One web app for every phone
- Open-source stack, AI optional
- Runs on one small cloud server

SMARTER PLANNING

- Live capacity across districts
- Real demand data for planning

EXPECTED OUTCOME

Every emergency in Madhya Pradesh reaches a hospital that has already said **yes** – with 108 on the way and the ER ready – **confirmed in minutes, not after a wasted trip.**

WHY SHOULD WE BE SELECTED?

It works today

Live site: speak → hospital accepts → 108 ambulance → tracking, end to end.

Ready for real 108

Signed incident contract, proven with our practice control room.

Built for rural MP

Hindi voice, 2G / SMS / offline, 102 Janani Express for mothers.

Secure & private

Aadhaar OTP, AES-256-GCM, tamper-evident audit, no Aadhaar stored.

Low cost, scalable

Open-source stack, one web app for every phone, AI optional.

Responsible AI

Never diagnoses; hospitals decide; Call 108 is always one tap away.
